Create Database

# Tables Creation Steps:

after creating a project called (Parties Organising DB) Database, we click on it.

inside cluster0 there are a collection section, which is the tables section.  
after clicking collection tab, we click on create collection button.

A screenshot of the 'Create Collection' dialog box. It has a title bar with a close button. The form contains: 'Database name' with a dropdown showing 'DBproject'; 'Collection name' with a text input field containing 'User' and a blue border; 'Additional Preferences' with a dropdown showing 'Select'. At the bottom right are 'Cancel' and 'Create' buttons, with the 'Create' button circled in red.

here we just write the name of the wanted collection / table, and then hit create button and it will be added directly to the cluster0 in DBproject.
